

GAIL advances net zero target for scope-1 and scope-2 GHG emissions to 2035

GAIL (India) Limited Board of Directors accorded approval to advance its Net Zero target for Scope-1 & 2 emissions by five (05) years, from the year 2040 to year 2035 on 28 June.

This decision follows an extensive study undertaken by GAIL to enhance its sustainability goals and align with India's broader Net Zero commitments.

GAIL plans to achieve this ambitious goal through a strategic approach involving Electrification of NG based equipments, Renewable Energy, Battery Energy Storage Systems (BESS), Compressed Biogas (CBG), Green Hydrogen, CO₂ Valorization initiatives and afforestation.

By advancing its emission reduction targets to 2035, GAIL reaffirms its role as a trailblazer in India's energy landscape, driving sustainable development and contributing significantly to India's Net Zero emission target.

GAIL opens new round for solicitation of proposals from start-ups

In a bid to support the start-ups operating in identified focus areas, GAIL (India) Limited, a Maharatna company and one of the leading investors among oil PSUs, plans to invest in such companies through its Start-Up initiative 'Pankh'.

GAIL has now opened a fresh round, which is 9th round for solicitation of investment proposals from Start-Ups operating in focus areas. Details of focus areas are available on GAIL website (<https://gailonline.com>) under the 'GAIL Pankh' Section.

The focus areas mainly include natural gas and its adjacencies, city gas distribution, pipeline operation and maintenance, petrochemicals, energy, renewable and alternate energy sources, energy storage, energy sector related software products, project management, nano-materials, IOT, automation and robotics, emerging mobility, data mining, environment, health, social, safety and security, etc.
